PROFILE

Electrical engineer specializing in electronic design, with experience in printed circuit board development, validation, production transfer, and embedded systems. Particularly interested in projects combining electronics, programming, and robotics, with a hands-on approach focused on practical design and problem-solving.

SKILLS

ALTIUM KICAD EASYEDA LTSPICE
C/C++ VHDL PYTHON ARDUINO
GIT MATLAB MODELSIM

PROFESSIONAL EXPERIENCE

- | | | |
|-----------------------------|---|---------------------------------------|
| 2024 – Present
Full-time | Electronics Designer
<ul style="list-style-type: none">Design and commission PCBs for various electronic products.Conduct certification testing and document the results.Troubleshoot hardware issues and implement necessary modifications.Participate in the transfer of products to production.Collaborate with design, test, and production teams. Altium / VHDL / Ruby | Gentec Inc. |
| 2023
Full-time | Electronics Designer
<ul style="list-style-type: none">Troubleshoot and refurbish the traction and power supply circuits of a train in Jacksonville.Design various electronic circuits using Altium. Altium / LTspice / C++ | Transtech Innovations |
| 2021
Full-time | Hardware Design Intern
<ul style="list-style-type: none">Design a power supply circuit for cutting lasers rated above 1 kW.Provide training on the use of Altium. Altium / LTspice / C++ | ITF Technologies |
| 2018 – 2022
Part-time | Laboratory Assistant
<ul style="list-style-type: none">Assist students with laboratory assignments.Grade laboratory assignments. Laboratories taught: <i>Circuits</i> (TCH011), <i>Programmable Logic Controllers</i> (TCH015), <i>Environmental Technologies</i> (TCH097), <i>Multidisciplinary Project</i> (TCH098), <i>C Programming</i> (INF147). | École de technologie supérieure (ÉTS) |

EXTRACURRICULAR INVOLVEMENT

- | | | |
|-------------|---|-------------------------------------|
| 2024 – 2025 | Co-VP, Machine
<ul style="list-style-type: none">Design and test the "La Machine" robotics design challenge.Design the electrical circuits and PCBs required for the challenge.Coordinate a team of directors responsible for the Machine challenge.Oversee the Machine challenge during the Engineering Games 2025 competition. | Engineering Games 2025 |
| 2023 – 2024 | Senior Director
<ul style="list-style-type: none">Design and test the Senior challenge for QEC 2024.Design and test the Pre-Senior qualifying challenge for QEC 2024.Oversee the Senior challenge during the QEC 2024 competition. | Quebec Engineering Competition 2024 |
| 2019 – 2022 | Machine Delegate for Eng. Games
<ul style="list-style-type: none">Participate in the 2020 and 2023 Engineering Games competitions.Manage the electrical aspects of robot design for the Machine and Majeur challenges. | Engineering Games ETS |
| 2018 – 2019 | Electrical Systems Lead
<ul style="list-style-type: none">Train a new electrical and software team for the vehicle.Develop an automatic pitch adjustment system.<ul style="list-style-type: none">Objective: Maximize wind turbine power output. | Chinook ETS |

EDUCATION

2018 – 2022
2017 – 2018
2014 – 2017

Bachelor of Electrical Engineering
University Preparatory Program
Natural Sciences

École de technologie supérieure (ÉTS)
École de technologie supérieure (ÉTS)
Cégep de Sainte-Foy

PROJECTS

2022

Design of a Modular Robotic Control System

Jeux de Génie de l'ÉTS

Develop a battery-powered circuit capable of controlling different types of motors to accelerate the development of future robotic prototypes in collaboration with Jeux de Génie de l'ÉTS.

KiCAD / Arduino IDE

2022

Raspberry Pi Clone Development

Integrate HDMI, USB, and Ethernet ports as well as an SD card onto a PCB.

Altium

2020 – 2022

Macro Keyboard Development

École de technologie supérieure (ÉTS)

Develop and manufacture a low-cost macro keyboard to help instructors teach their courses remotely as part of a project with the university.

EasyEDA / Arduino IDE

2018

Remote-Controlled Hovercraft Construction

Multidisciplinary Project (TCHog8)

Build control circuits for the hovercraft and its remote controller.

Develop the software running on the PCBs.

Altium / C/C++

HOBBIES

Climbing

- Indoor bouldering.

Cycling

- Preferred means of transportation.
- Longest distance: 128 km (Quebec City to Trois-Rivières).
 - Objective: Personal challenge to test my limits.
